## SUMMARY

Proactive Software Engineer specializing in modern web applications with expertise in React.js and API integration. Successfully contributed to multifaceted projects such as employee management systems and real-time dashboards, emphasizing usability and performance. Recognized for rapid learning, innovative problem-solving, and teamwork in fast-paced environments. Aiming to deliver advanced solutions in collaborative software development settings.

## EXPERIENCE

### Software Engineer

#### Goa Electronics Limited

06/2023 - Present Panjim Goa

- Built and maintained responsive web apps using React.js, Ant Design, and REST APIs.
- Delivered dynamic, role-based modules with a focus on performance and clean architecture.
- Collaborated with backend teams for seamless API integration and testing.
- Refactored and optimized frontend logic to reduce redundant API calls and improve overall application performance.
- Built reusable components and followed clean, modular coding practices to enhance scalability and maintainability.
- Prioritized structured planning, effective testing, and component reusability to reduce rework and improve long-term efficiency.

### Intern

#### Spintly India Private Ltd

04/2023 - 04/2023 Fatorda Goa

- Identified and reported firmware defects by executing comprehensive test plans.
- Tested 5 device units by executing 3 comprehensive test plans and cases.

### Intern

#### Smartlink Holdings Ltd

03/2021 - 03/2021 Fatorda Goa

- Worked on different networking products configuration and testing (Digisol)
- Conducted testing for fiber optic cable manufacturing (Telesmart)

## EDUCATION

### Bachelor of Engineering (ETC)

#### Don Bosco College of Engineering

2018 - 2022 Fatorda Goa

## LANGUAGES

### English

Proficient

### Konkani

Advanced

### Hindi

Advanced

## KEY ACHIEVEMENTS

Optimized recursive API calls post-deployment improving system performance in a live environment, Won at the constituency-level in a badminton tournament

## SKILLS

### Proficient

HTML, CSS, Javascript, Bootstrap. React Js, Next Js

### Basic

ASP.NET, PostgreSQL, MySQL, Postman, Python, C

### Soft skills

Adaptable, Quick learner, open to new technologies, Team Collaboration, Problem Solving, Communication

## PROJECTS

### Smart Mirror

01/2023 - 01/1970

- Built a user interactive smart mirror using Raspberry Pi that displays the current date, time, weather, news, and events, plays music, videos, and clicks selfies with the smart mirror
- Mirror can be controlled by voice input (Google Assistant) or touch screen. User can even control the smart mirror when he or she is away from home.

## INTERESTS

### Badminton

Engaging in sports and fitness activities to maintain a balanced and healthy lifestyle

### Art Journal

Channeling my thoughts through art way
